For easy editing as MS Word table - [Edit/print-friendly table](#)

Page menu: [Tokens](#) (Includes AWL subs) [Types](#) [Families](#) (Includes VP negative)

Note: In the output text, punctuation is eliminated; all figures (1, 20, etc) are replaced by the word *number*; contractions are replaced by constituent words (*won't* => *will not*); type-token ration is calculated using said constituents; and in the 1k sub-analysis content + function words may sum to less than total (depending on user treatment of proper nouns and program decision to class numbers as 1k although not contained in 1k list); single letters are eliminated except for 'a' and 'l.'
